11. *Journal of the American Medical Association*, 1997; 278: 1019-1024.

Il secondo è relativo alla possibilità di un'azione di "cambio di rotta" da parte del Parlamento europeo, che si è impegnato a "promuovere" la "cooperazione" tra i paesi dell'area del dollaro e dell'euro, e che ha già fatto un tentativo di "cooperazione" con il Giappone.

22. *Species*: no particular changes were observed in species composition of the vegetation in the study area.

Racismo às Avessas

Walter R. Ford, Associate Professor of Economics, University of Illinois at Chicago

[illegible]

tion, and the fact that a considerable proportion of the non-respondents are females may indicate that females are more reluctant to make responses, possibly due to the time involved in completing the questionnaire. If so, we can interpret our results with caution, especially in relation to the female respondents. It is possible that the non-respondents are more health conscious, but it is equally possible that they are more health conscious than the respondents. The latter is more likely to be the case, since the respondents were selected from a random sample of the population of the area. Furthermore, there is no reason to believe that the respondents are disproportionately

В настоящее время в литературе по фитофагии насекомых (в частности, по фитофагии насекомых-вредителей) накоплено большое количество фактов, свидетельствующих о том, что насекомые-вредители растений (в т. ч. и фитофаги) способны к изменению своего поведения в зависимости от условий среды обитания.
