"Condoms are not the only way to prevent AIDS, but they are the only way to prevent it 100 percent," says Dr. Robert C. Bozinger, director of the program. En el mundo, a veces, se dice que el desarrollo de una nación depende de la calidad de su educación. Pero, ¿qué es la educación? ¿Es simplemente la transmisión de conocimientos? ¿Es la formación de valores? ¿Es la adquisición de habilidades? La educación es un proceso complejo que involucra a todos los aspectos de la vida humana. Es el proceso de adquirir conocimientos, habilidades, valores y actitudes que permiten a una persona desenvolverse en la sociedad. La educación es fundamental para el desarrollo personal y social de una nación. Sin una buena educación, una nación no puede avanzar ni mejorar su calidad de vida. Por lo tanto, es esencial que todos los países se comprometan a proporcionar una educación de calidad a todos sus ciudadanos.

Plutarco responde: "Porque he leído esta obra tantas veces que ya me he acostumbrado a ella". El estudiante pregunta: ¿por qué? Assim, entre a paisa antiga, americana, do velho hemisfério de fortes convulsões e flutuações, para não falarmos de tanta educação, profissões nobres, quanto ao conhecimento da língua literária, do universo e impagável criatividade dos escritores, há indubitavelmente, em parte, de outro elemento das coisas americanas, mais simplesmente ligadas à realidade.
